LED ON at Night

EASY TO TURN ON THE LIGHTS

Touch sensitive panel, LED backlight
special light effect at night

The light is low-light display, won't effect people's sleeping

Sensitive touch one touch to make it work

Using capacitive touch design, as smart phone version of the touch sensor
Millisecond response speed, to bring you not the same experience

Advanced materials

Similar but not the same shows our quality

Special Panel Diamond Hardness

Compressive wear and tear

Unique style with quite thin panel

Thinner, more sensitive

1mm Tempered Panel

High request for craft makes more sensitive touch control .
Crystal appearance with wearable material. which will become obtuse angle
small particles when it is broken from rude falling .Good protection for people.

Smart Control Enjoy Your Life

Smart light switch can be not only controlled by touch, but also can be controlled by z-wave gateway . Download APP, connect to the smartphone .it allows you to control it remotely from your phone. Compatible with varied z-wave gateway .

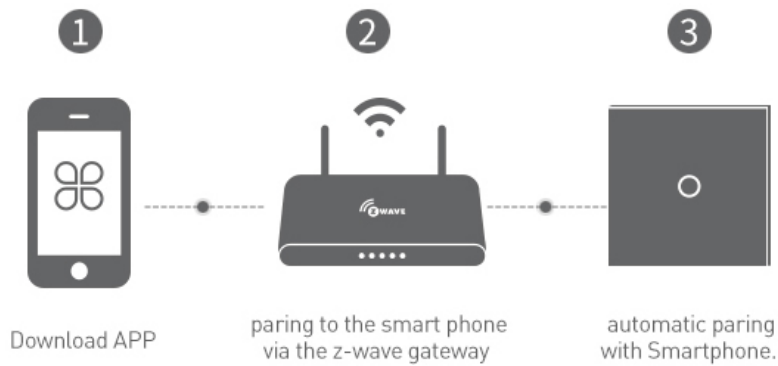

*The photo is just for your reference.

PARING

Easy 3 steps and pared with your phone

Easy and smart.Inclusion the light switch to the phone ,
which will allow you to control the light switch remotely .

Smart Home Full Guard

Support multi-device controlled .
Can be working interactively with other z-wave sensors via the gateway
Enjoy your smart home with NEO light switch .

Energy Saving make you peace of mind

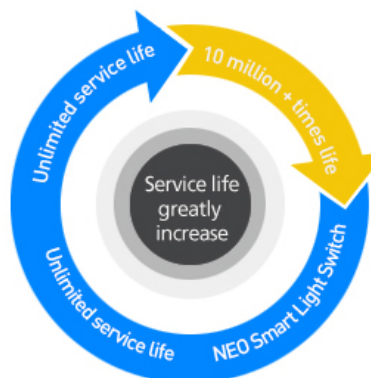

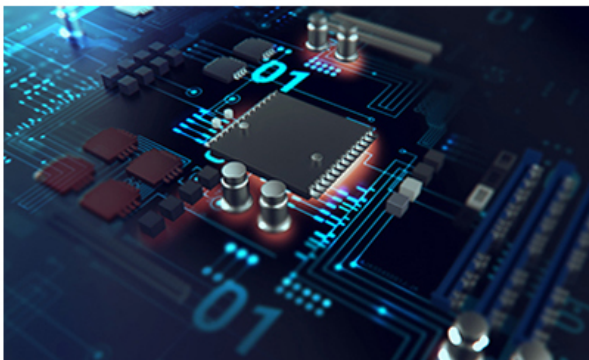

Check the real-time status of light from your mobile phone APP.
Remind you to turn off lights and save energy.
Make life easier ,make energy-saving easier .

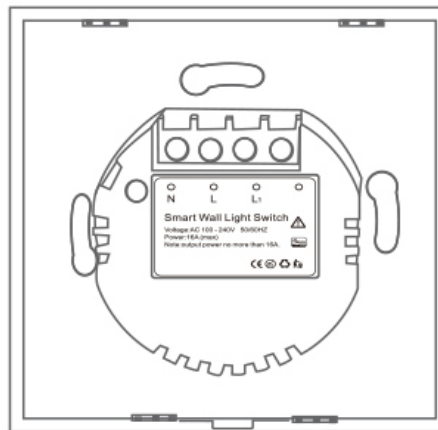

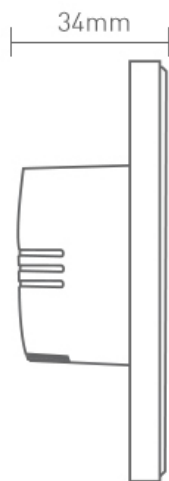

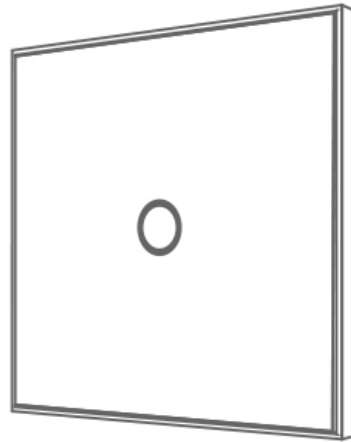

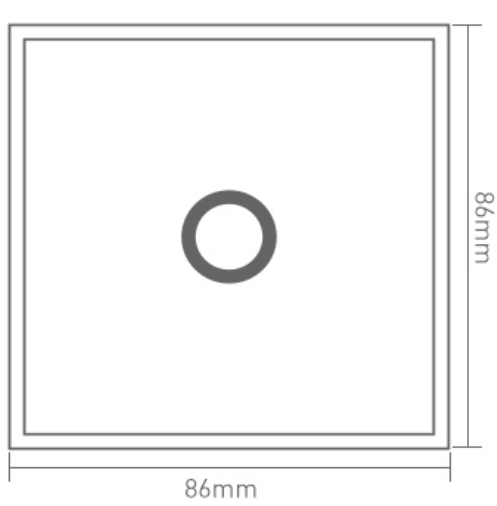

Long time lifetime

Innovation makes it

Traditional switch is with relay which will decrease the lifetime because of machinery loss .Innovated light switch is with a new generation semiconductor chip without any physical loss at all. It can extend the lifetime and can be used without limitation.

SPECIFICATION

Type	EU 1 Gang
Voltage	AC100-240V
Material	Panel: Single crystal tempered glass Surface: Germany Bayer Flame Retardant PC
Radio protocol	Z-Wave
Radio frequency	908.4MHz US; 868.4MHz EU
Range	up to 80m outdoor, up to 40m indoor
Standby Power Consumption	<0.007W
Continuous working times	no limited
Working Environment	temperature:0-40 degree . humidity:10%-95%
Packing List	light switch x1 ,manual x1

Easy Installation

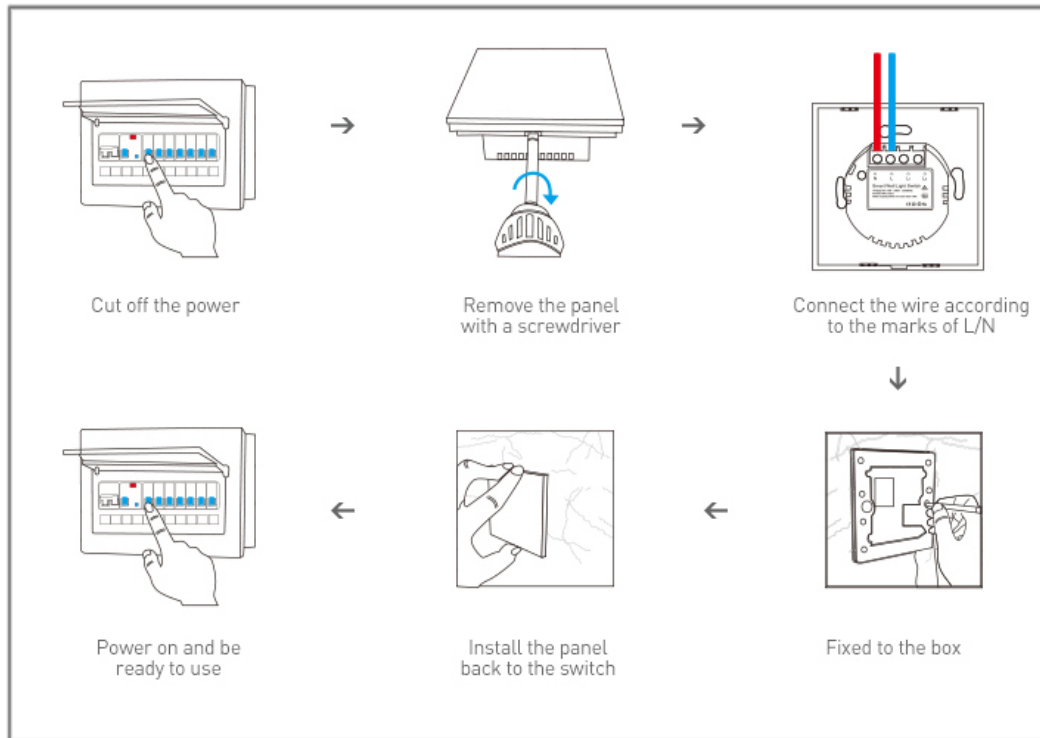

Meet the requirements of traditional switch wiring, No need to change the existing wire.
Install it directly to replace the existing switch .

INSTALLATION

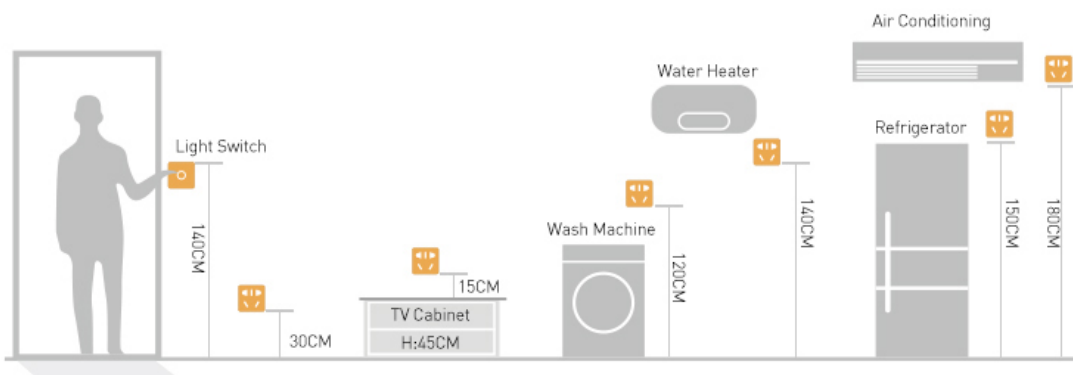

Make sure the electric power is off before installing!

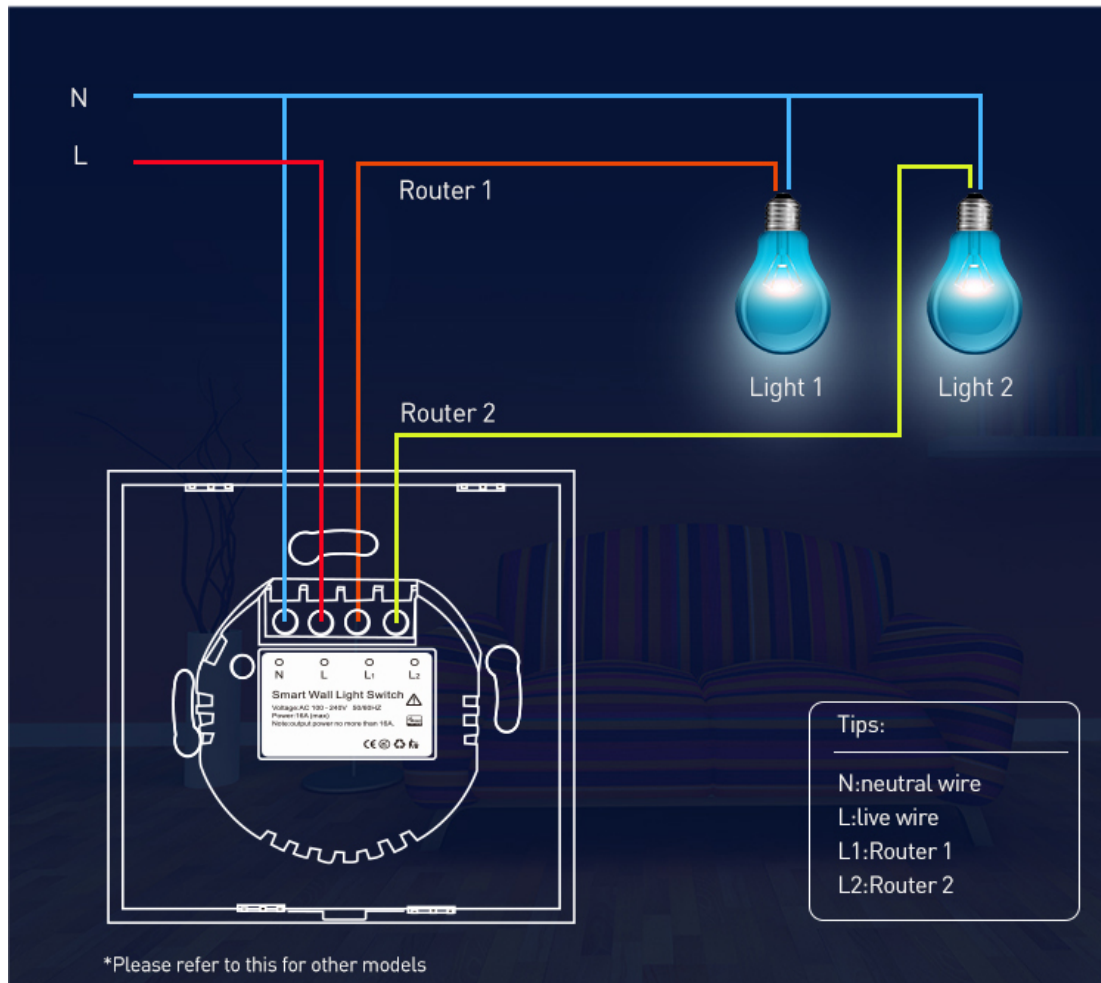

Installation Instruction:

- 1: Remove the panel with a screwdriver
- 2: connect the wire according to the marks of L/N. Wire's cross-sectional area is 1.5-4 Square millimeters. Length is 9-11mm.
- 3: fixed it to box .
- 4: install the panel back to the switch
