

VEMMIO

motion mini sensor

**MOTION
SENSOR**

**LIGHT
SENSOR**

motion mini sensor

Motion Mini Sensor provides accurate motion and illumination level detection. When integrated with your gateway - wireless notifications, low battery alerts, custom automation scenarios based on both light and motion triggers become available. For example, when motion is detected, the gateway will send an alert to any smartphone, set off an alarm or trigger a lighting scene. The sensor works with any Z-Wave-certified gateway.

key features

Ultra smart and simple design – becomes part of your home decoration

Easy and quick installation

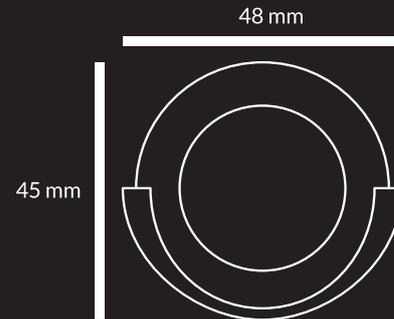

Uses motion and illumination sensors

Low-energy use

Illumination measurement up to 1000 lux

| | |
|-----------------------------------|--------------------------------|
| Wireless standard | Z-Wave Plus |
| Frequency | 868.40 MHz |
| Network range | 30 m line of sight |
| Operating temperature | 0°C ~ 40°C |
| Illumination measurement Range | 0 ~ 1000 lux |
| Movement Sensor Measurement Range | 6 m |
| Battery | CR123A 3V |
| Battery: run time | >2 years, low power indication |
