

Dear customer,

Glad to know our **TP-807ZG** Z-wave Smoke/Carbon Monoxide/Natural Liquefied Gas Leak Detector reached, please read below use guide carefully,

- This sensor can not work alone, need connect to Z-wave gateway
- 4pcs AAA battery (not include, sometime battery delivery with problems)
- First time connect, the distance between sensor and gateway better less than 1.0 meter, after connected, then install the sensor where you need
- When connect to gateway, choose add device in your gateway software, then quickly click the sensor's z-wave trigger 3 times to send signal to gateway, delete device similar operation
- The work distance to gateway is 10 to 20 meters indoor, more wall or barrier will influence the distance
- This sensor install please check below picture
 - Natural gas lighter than air, need install less than 0.3 meter to the ceiling, less than 4.0 meters to the source
 - Liquefied Gas heavier than air, need install less than 0.3 meter to the floor, less than 4.0 meters to the source
 - Carbon Monoxide similar weight as air, not with height requirements, but not more than 4.0 meters to the source
 - Smoke detect suggest ceiling
